BAKER COUNTY FITNESS CENTERS-GYMS RE-OPENING PLAN

The Baker County Commissioners submitted a plan to Governor Brown's office on April 24 outlining a phased approach to reopening businesses, organizations and events in Baker County that are currently closed by the Governor's Stay Home, Save Lives Executive Order 20-12. The plan was developed through coordination between the Baker County Commissioners, Baker County Health Department, St. Alphonsus Medical Center-Baker City, and the County Public Health Officer. The plan proposes three phases for reopening, and includes measures that can be put in place to reduce the risk of transmitting disease. Baker County has entered into Phase 1 of the State of Oregon framework and will be proposing guidelines for Phase 2, with a potential date of June 6th .

Phase I—State-Regional Guidance: FITNESS CENTERS-GYMS

Following you will find the Governor's regional requirements for opening in the this time of Pandemic:

Reopening Guidance

Governor Kate Brown's framework for Reopening Oregon will help Oregonians restart public life and business while maintaining healthy Oregon communities. The framework outlines actions Oregonians must take to move forward safely.

As the state reopens, it's important to remember the risks. We must all do our best to protect ourselves and one another. If we all follow these actions, we will help save the lives of our colleagues, neighbors, friends, and family members.

These actions include:

- Stay home if you are sick.
- To avoid exposure to COVID-19, people who are at risk for severe complications (over age 60 or have underlying medical conditions) should stay home even if you feel well.
- If you become symptomatic (cough, fever, shortness of breath) while in public, please return home and self-isolate immediately. Contact your health care provider if you need medical attention.
- Practice good hand hygiene with frequent handwashing for at least 20 seconds or use hand sanitizer (60-95% alcohol content).
- Cover coughs/sneezes with elbow or tissue. If you use a tissue, immediately discard tissue in garbage and your wash hands.
- Avoid touching your face.
- Practice physical distancing of at least six (6) feet between you and people who you do not live with.
- Use cloth, paper or disposable face coverings in public. As Oregon is reopening and restrictions are being lifted on businesses and public spaces, it may be difficult to ensure that you can stay six (6) feet away from others at all times. Please review [Mask and Face Covering Guidance for Business, Transit and the Public](#).
- Stay close to home. Avoid overnight trips and minimize other non-essential travel, including recreational day trips to destinations outside the community where you live. Travel the minimum distance needed to obtain essential services; in rural areas, residents may have to travel greater distances for essential services, while in urban areas, residents may only need to travel a few miles for those services.

Additional resources:

- [Mask and Face Covering Guidance for Business, Transit and the Public](#)
- [OHA General Guidance for Employers](#)

This guidance is issued at the direction of the Governor under [Executive Order No. 20-25](#).

Oregon General Guidance for Employers on COVID-19

General considerations for your workplace:

- Comply with any of the Governor's Executive Orders that are in effect.
- Know the signs and symptoms of COVID-19 and what to do if employees develop symptoms at the workplace.
- Understand how COVID-19 is transmitted from one person to another—namely, through coughing, sneezing, talking, touching, or via objects touched by someone with the virus.
- Make health and safety a priority by implementing safeguards to protect employees and the public. Federal and state guidelines, including sector-specific guidance, will help you determine which safeguards are recommended or are required.
 - CDC has detailed [general guidance](#) to help small businesses and employees prepare for the effects of COVID-19.
 - [Oregon's Mask and Face Covering Guidance for Business, Transit and the Public](#).
 - Oregon's specific guidelines for specific sectors can be found [here](#).
- Consider modifying employee schedules and travel to reduce unnecessary close physical contact (physical distance of less than (6) six feet between people).
- Be aware of protected leave requirements and plan ahead for any anticipated workforce adjustments.

Modification of employee schedules and travel

Considerations for modifying employee schedules and travel as feasible:

- Identify positions appropriate for telework or partial telework, including consideration of telework for employees who are at higher risk for severe COVID-19 complications due to underlying medical conditions identified by the CDC.
- Stagger or rotate work schedules or shifts at worksites to ensure employees are able to sufficiently maintain physical distancing.
- Limit non-essential work travel.

Workplace safety

Implement workplace safeguards as feasible or when required. [See also sector-specific guidance here.](#)

- Implement physical distancing measures consistent with the Governor's Executive Orders and state guidance.
- Increase physical space between workers. This may include modifications such as markings on the floor demonstrating appropriate spacing or installing plexiglass shields, tables or other barriers to block airborne particles and maintain distances. Review and follow any sector-specific guidance issued by the state that recommends or requires specific physical distancing measures.
- Restrict use of any shared items or equipment and require disinfection of equipment between uses.
- Reinforce that meticulous hand hygiene (frequent and proper handwashing) is of utmost importance for all employees. Ensure that soap and water or alcohol-based (60-95%) hand sanitizer is provided in the workplace. Consider staging additional hand washing facilities and hand sanitizer for employees (and customer use, if applicable) in and around the workplace.
- Regularly disinfect commonly touched surfaces (workstations, keyboards, telephones, handrails, doorknobs, etc.), as well as high traffic areas and perform other environmental cleaning.
- Some employers are required to have employees and contractors wear masks, face shields or face coverings and transit agencies are required to have riders wear face coverings. When masks or face coverings are required an employer must provide for exceptions and accommodations to comply with applicable laws. Employers should review and implement the [Mask and Face Covering Guidance for Business, Transit and the Public](#) to ensure compliance with the requirements and recommendations.
- Consider upgrades to facilities that may reduce exposure to the coronavirus, such as no-touch faucets and hand dryers, increasing fresh-air ventilation and filtration or disinfection of recirculated air, etc. Consider touchless payment method when possible and if needed.
- Limit the number of employees gathering in shared spaces. Restrict use of shared spaces such as conference rooms and break rooms by limiting occupancy or staggering use.
- Restrict non-essential meetings and conduct meetings virtually as much as possible. If in-person meetings are necessary, follow physical distancing requirements.
- Consider regular health checks (e.g., temperature and respiratory symptom screening) or symptom self-report of employees, if job-related and consistent with business necessity.
- Train all employees in safety requirements and expectations at physical worksites.

Employee leave and health insurance

Be aware of federal and state protected leave and paid leave laws (if applicable) and requirements for health insurance coverage:

- Advise employees to stay home and notify their employer when sick.
- Review and comply with any applicable requirements for maintaining employee health insurance coverage.
- Healthcare provider documentation is generally not required to qualify under federal and state leave laws due to COVID-19 related circumstances or to return to work.
- Review and comply with any applicable required federal and state leave law protections for employees who are unable to work due to COVID-19 related circumstances.
- Determine whether your business can extend paid or unpaid leave and if feasible adopt a temporary flexible time off policy to accommodate circumstances where federal or state law does not provide for protected or paid leave.
- Develop an action plan consistent with federal and state guidance if an employee develops symptoms while in the workplace, tests positive for COVID-19 or is determined to be presumptively positive by a public health authority.

Downsizing and layoffs

If downsizing or other workforce adjustment measures are necessary, adhere to applicable state and federal requirements regarding notice of layoffs and recalls for affected workers:

- Determine whether alternatives to layoff may be feasible such as furloughs or reduced schedules.
- Refer employees to resources including filing for unemployment benefits and community services.
- Create a plan for recalling employees back to work.

Union workplaces

If you have a unionized workforce, determine obligations to bargain with the union or unions which represent your employees.

Mask and Face Covering Guidance for Business, Transit, and the Public

For purposes of this guidance the following definitions apply:

- “Business” means:
 - Grocery stores
 - Fitness-related organizations
 - Pharmacies
 - Public transit agencies and providers
 - Personal services providers
 - Restaurants, bars, breweries, brewpubs, wineries, tasting room and distilleries
 - Retail stores
 - Ride sharing services
- “Face covering” means a cloth, paper, or disposable face covering that covers the nose and the mouth.
- “Mask” means a medical grade mask.
- “Face shield” means a clear plastic shield that covers the forehead, extends below the chin, and wraps around the sides of the face.
- “Personal services providers” means barber shops, hair salons, esthetician practices, medical spas, facial spas and day spas, non-medical massage therapy services, nail salons, tanning salons, and tattoo/piercing parlors.
- “Fitness-related organizations” includes but is not limited to gyms, fitness centers, personal training, dance studios, and martial arts centers.

Businesses

A business **must**:

- Require employees, contractors and volunteers to wear a mask, face shield, or face covering, unless an accommodation for people with disabilities or other exemption applies.
- Provide masks, face shields, or face coverings for employees.

- If it is a transit agency, require riders to wear face coverings and provide one for a rider that does not have one, and develop policies and procedures as described below.
- Develop and comply with policies and procedures that provide for accommodations and exemptions from the mask or face covering requirement for employees and contractors based on:
 - State and federal disabilities laws if applicable, including the Americans with Disabilities Act (ADA) which protects people with disabilities from discrimination in employment and requires employers to engage in the interactive process for accommodations.
 - State or federal labor laws where applicable.
 - State and federal public accommodations laws that provide all persons with full and equal access to services, transportation, and facilities open to the public.
 - OHA public health guidance if applicable.
- If customers or visitors will be required to wear a face covering, develop a policy and post clear signs about any such requirements. A policy that requires customers and visitors to wear face coverings must:
 - Provide exceptions to the policy to accommodate people with certain health conditions, or children under two years of age.
 - Take into account that places of public accommodation must make reasonable modifications to their policy to allow people with disabilities to access their services.
 - Take into account that requiring people to wear face coverings affects people differently including people of color who may have heightened concerns about racial profiling and harassment due to wearing face coverings in public.
 - Consider whether to provide face coverings for customers or visitors who do not have one.
- Require employees and contractors to review the business's policies and procedures related to:
 - Employee accommodations and exemptions.
 - Customer and visitor face covering requirements.

A business should, but is not required to:

- Post signs about whether customers or visitors are required to wear face coverings in languages that are commonly spoken by customers and visitors
- Educate employees:
 - On how to safely work and communicate with people who cannot wear masks or face coverings.
 - That they may need to remove a mask or face covering for individuals who need to read lips or see facial expressions to communicate.

The Public

- When riding public transit, an individual must wear a face covering unless the individual:
 - Is under two years of age.
 - Has a medical condition that makes it hard to breathe when wearing a face covering.
 - Has a disability that prevents the individual from wearing a face covering.
- It is strongly recommended that individuals, including children between 2 and 12 years of age, wear a face covering at all times in settings like grocery stores or pharmacies, where it is likely that physical distancing of at least six feet from other individuals outside their family unit cannot be maintained, and vulnerable people must go.
- Because children between the ages of two and 12 years of age can have challenges wearing a face covering properly (e.g. not touching the face covering, changing the face covering if visibly soiled, risk of strangulation or suffocation, etc.) we urge that coverings be worn with the assistance and close supervision of an adult. Face coverings should never be worn by children when sleeping.

Phase One Reopening Guidance

Sector: Fitness

800 NE Oregon

Portland OR 97232

COVID.19@dhsosha.state.or.us

healthoregon.org/coronavirus

Specific Guidance for Fitness-related Organizations:

Fitness-related organizations include but are not limited to gyms, fitness centers, personal training, dance studios, and martial arts centers.

Distancing and Occupancy:

Fitness-related organizations are required to:

- Limit the number of individuals in the facility and focus on maintaining at least six (6) feet of physical distance between people. Each facility should use its total square footage to determine the maximum number of occupants for the entire facility.
- Determine the maximum occupancy for different areas of the gym (e.g., classrooms, weight room, gymnasium, locker room) and limit admittance accordingly.
- Limit fitness class size to maximum occupancy of the room (as long as it ensures six (6) feet of separation).
- Consider holding fitness activities or classes outdoors if it can be done safely, when it does not violate any local ordinances, and when participants and instructors can maintain six feet of physical distance. Limit exercise equipment stations to those located at least six (6) feet apart. If equipment cannot be moved to facilitate physical distancing, it must be blocked from being used.
- Prohibit contact sports that involve participants coming into bodily contact, close quarters (less than six (6) feet apart), or using shared equipment (e.g., basketball, squash, racquetball, taekwondo, karate, wrestling, mixed martial arts).
- Only allow gymnasiums to be used for non-contact sports or individual skills development not requiring contact with other people.
- For one-to-one personal training, maintain six (6) feet of physical distance between trainer and client. If close contact within six (6) feet is unavoidable, it is strongly recommended that the client wear a face covering and the time during which close contact occurs is minimized. Trainer and client should thoroughly wash hands with soap and warm water or use hand sanitizer (60-95% alcohol content) immediately before and after appointment.

Operations:

Fitness-related organizations are required to:

- Review and implement [Mask and Face Covering Guidance for Business, Transit and the Public](#).
- Ensure all facilities and equipment are safe to operate and are in good condition after the extended closure. Maintenance and operations manuals and standard operating procedures should guide this work.
- Close water fountains, except for those designed to refill water bottles in a contact-free manner.
- Close showers for use. Locker room sinks and toilets may remain open for use but limit the number of people who use the facilities at any one time to ensure that a distance of six (6) feet can be maintained.
- Keep saunas, steam rooms and whirlpool spas closed.
- Keep pools closed to recreational swim activities, swimming lessons, and all other aquatic activities.
- Keep drop-in childcare closed.
- Refer to and apply [Guidance for School Aged Summertime Day Camps](#) for any children and youth programs.
- Post [clear signs](#) listing COVID-19 symptoms, asking employees and clients with symptoms to stay home, and listing who to contact if they need assistance.
- Use [signs](#) to encourage physical distancing throughout facility, including but not limited to reception areas, eating areas, locker rooms, and near popular equipment.
- Position staff to monitor physical distancing and disinfecting requirements.
- Ensure that ventilation systems operate properly. Increase air circulation as much as possible by opening windows and doors, using fans, or other methods. Do not open windows and doors if doing so poses a safety risk to employees, children, or customers.
- Establish one-way traffic flow, where possible, for equipment circuits, tracks, etc. Use signs to direct one-way flow of traffic.
- Provide handwashing stations or hand sanitizer (60-95% alcohol content) throughout the facility for use by employees and clients.
- Refer to [Restaurant Sector Guidance](#) for information about food handling and distribution as applicable to each fitness facility.
- Review and implement [General Employer Guidance](#), as applicable.

To the extent possible, fitness-related organizations should, but are not required to:

- Encourage clients to wear cloth, paper, or disposable face coverings.
- Consider placing clear plastic or glass barriers in front of reception counters, or in other places where maintaining six (6) feet of physical distance between employees and clients is more difficult.

- Consider having gym time by appointment to limit number of people in the facility. Encourage use during non-peak times as determined and publicized by facility management.
- Consider offering virtual fitness classes, especially for persons at higher risk for severe COVID-19 complications such as people over 60 or with underlying medical conditions.
- Encourage one-way flow with marked entrances and exits, but do not block egress for fire exits. Use signs to direct one-way flow of traffic.
- Strongly encourage clients to bring their own filled water bottles with them to the facility.

Cleaning and Disinfection:

Fitness-related organizations are required to:

- Thoroughly clean all areas of fitness-related organization prior to reopening after extended closure.
- Use disinfectants that are included on the [Environmental Protection Agency \(EPA\) approved list](#)¹ for the SARS-CoV-2 virus that causes COVID-19. No product will be labeled for COVID-19 yet, but many will have human coronavirus efficacy either on the label or available on their website.
- Require employees or facility guests to wipe down all equipment (e.g., balls, weights, machines, etc.) immediately before and after each use with a disinfectant provided by the gym that is included on the EPA-approved products for the SARS-CoV-2 virus that causes COVID-19. A solution of 70%-95% alcohol content also works.
- Frequently clean and disinfect work areas, high-traffic areas, and commonly touched surfaces in areas accessed by workers and public.
- Thoroughly clean restrooms at least twice daily and ensure adequate sanitary supplies (e.g., soap, toilet paper, 60-95% alcohol content hand sanitizer) throughout the day.

To the extent possible, fitness-related organizations **should**, but are not required to:

- Strongly encourage clients to wash hands with soap and water for 20 seconds and/or use hand sanitizer (60-95% alcohol content) immediately before and after gym session as well as several times during the session.
- Flush water pipes weekly while the building is vacant and prior to resuming normal building use. Stagnant water in pipes can create conditions that favor the growth and spread of Legionella and other harmful bacteria (see [Guidance for Reopening Building Water Systems after Prolonged Shutdown](#)).

¹ <https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2>

Client Screening:

Fitness-related organizations are required to:

- Record client contact information, date and time for client facility use. If there is a positive COVID-19 case associated with the facility, public health officials may need the business to provide this information for a contact tracing investigation. Unless otherwise required, this information may be destroyed after 60 days from the session date.

To the extent possible, fitness-related organizations should, but are not required to:

- Screen clients prior to start of their session in the facility such as asking:
 - Have you had a new or worsening cough?
 - Have you had a fever?
 - Have you had shortness of breath?
 - Have you been in close contact with anyone with these symptoms or anyone who has been diagnosed with COVID-19 in the past 14 days?

If the client responds “yes” to any of the screening questions, ask them to return home and wait to return to the facility until all symptoms, including fever have been resolved for at least 72 hours without medication, or at least 14 days after contact with a person with a cough, fever, or diagnosed with COVID-19.

- Strongly encourage a client exhibiting symptoms of illness to immediately leave the facility and not return until at least 72 hours after symptoms have resolved without medication.
- Strongly encourage clients at higher risk for severe COVID-19 complications (persons over age 60 or with underlying medical conditions) to continue to stay home to reduce their risk of exposure.
